3. Go to <https://steamworkshopdownloader.io> and paste the URL you copied from the workshop page into the bar on the website.

4. Now you will be given a question and 2 options. You will want to select the option that says “No” on the right hand side.

5. You will now get an entire 4 step guide on how to install SteamCMD and how to log in, once you have completed these 4 steps click continue at the bottom of the webpage.

(Continued on Next Page)

4. Type **login anonymous** and press enter. This will log you into an anonymous account.

Note: Some games require using a real steam account, otherwise downloads will fail.

```
C:\Users\Audio\Downloads\steamcmd\steamcmd.exe
Redirecting stderr to 'C:\Users\Audio\Downloads\steamcmd\logs\stderr.txt'

Steam>login anonymous_
```

5. You are now ready to download files.

Continue

6. Once you have pressed the Continue Button you will now get 2 extra steps which you must do. **IF YOUR DOWNLOAD TIMES OUT, ADD validate on the end (For Example: workshop_download_item 311210 2926551695 validate).** Once you have done both steps and the map has been installed, you will get a message that looks like this:

```
Success. Downloaded item 1541978411 to "C:\Users\Audio\Downloads\steamcmd\steamapps\workshop\content\294100\1541978411" (1064031 bytes)
```

You will now need to locate where your map has been downloaded and open up the folder.

Pay attention to 2 certain files it should start with zm_. You will want to right click one of them and click “**Rename**” from the menu that pops up. Hit **CTRL + C** to copy the name to your clipboard

8. Now navigate to your Black Ops 3 Directory (Install Location). For the torrent version the folder should just be called “**t7_full_game**” You will want to create a folder inside and name it “**usermaps**”.

crash_reports	22/09/2022 20:51	File folder	
LPC	18/04/2023 11:54	File folder	
minidumps	20/04/2023 10:08	File folder	
players	07/04/2023 22:13	File folder	
Unranked Server	17/04/2023 18:08	File folder	
usermaps	20/04/2023 15:25	File folder	
video	22/09/2022 20:51	File folder	
zone	22/09/2022 21:06	File folder	
BlackOps3.exe	07/04/2023 22:10	Application	139,780 KB

Once that is done, go inside the **usermaps** folder and make a brand new folder and the name will be what you copied from earlier (*My example would be zm_quiet_cosmos*). Do **CTRL + V** to paste the name in and hit enter and now your folder should be named like this:

zm_quiet_cosmos	18/04/2023 13:19	File folder	
-----------------	------------------	-------------	--

Now inside the **zm_mapname** folder you will want to copy over the files from your map folder that you went in from earlier. **See Step 7 if you can't remember**. Once you are inside your map folder, select all the files and do **CTRL + C** to copy them to your clipboard, go back to your **zm_mapname** folder (*shown above*) and hit **CTRL + V**. The files will now be copied into the **zm_mapname** folder.

(Continued on Next Page)

9. Once that is done, load up **boiii.exe** go into solo or private match and go to the map selection screen and if you scroll down you should have your workshop map there. (**All workshop maps are listed under Origins**).
